RESEARCH INTERESTS

I study how to build intelligent systems that make effective use of limited resources: improving reasoning while reducing computation and supervision during post-training, and enabling models to recognize their limitations and selectively use external resources at inference time. My interests include efficient LLM post-training, reinforcement learning with verifiable rewards (RLVR), test-time scaling, tool-augmented reasoning, and self-improving agents that learn through interaction.

EDUCATION

Korea Advanced Institute of Science and Technology (KAIST) Mar. 2022 – Present
B.S. in Computer Science; Minor in Mathematics Expected graduation: 2028
Mandatory military service: Republic of Korea Air Force, 2024–2025.

Hansung Science High School Mar. 2020 – Feb. 2022
Early graduation in two years.

RESEARCH EXPERIENCE

KAIST MLAI Lab Oct. 2025 – Present
Undergraduate Research Intern Advisor: Prof. Sung Ju Hwang
Research on LLM reasoning and post-training.

PUBLICATIONS AND PREPRINTS

ACADEMIC SERVICE

Reviewer: MATH-AI@NeurIPS 2026 Workshop.

TECHNICAL SKILLS

Programming Python; PyTorch
LLM Ecosystem Transformers, PEFT, TRL, verl, vLLM
Tools Weights & Biases, Git, Linux, L^AT_EX
Languages Korean, English
